EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. John Reed on July 8, 2005.

The application has been amended as follows:

Claims 2 and 3, line 1, before "weight", --plurality of-- has been inserted.

Claim 35, line 1, "at least one weight sensor comprises a" has been deleted.

Claim 35, line 2, after "sensors", --are-- has been inserted.

The following is an examiner's statement of reasons for allowance: for claims 1 and 32, it is the inclusion of a plurality of weight sensors for each leg or rung responsive to a controller such that upon generation of a weight signal in the sensors, the controller *compares differences in the signals to determine a measure of imbalance in the ladder* that exceeds a predetermined signal threshold and provides notorious indicia to a user through an alarm. For claim 33, it is the inclusion of the controller that measures differences in measured signals from the weight sensors to provide warning indicia to a user of impending tipping, the indicia having a category for no imminent tipping and a category of possible tipping. The prior art of record fails to teach or suggest the claimed features absent the applicant's own disclosure.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
